RE: 2021 Streetlight Project

Dear Property Owner/ Tenant:

The City of Lakewood (City) is preparing plans to place street lights on existing Tacoma Power poles for the 2021 Streetlight Project. The project includes placing a total of fifty-eight (58) streetlights throughout the North Lakewood neighborhoods.

This letter is being sent to coordinate the removal and replacement of an existing street light on a pole adjacent to your property.

The pole numbers associated with the existing streetlights are:

- TPU Pole 29371, 29900, 25711, 25714, 25863

As part of the project, a Contractor for the City will remove the existing street light and replace it with a new light on the street side of the pole, and will take over the payment of the electrical charges for that light.

As this light is an existing street light placed by a private property owner, the property owner who placed the light is due the existing equipment, if he or she would like to keep it.

If you are the property owner or know who the property owner is who had the street light installed on the TPU Pole stated above, please contact the Engineer, A. D'Andra Buchanan at (253) 983-7720.

The project is anticipated to begin in January/February 2022, depending on weather conditions.

Updates for the project can be found on the City's Website:

https://cityoflakewood.us/public_works_engineering/capital-projects/

Look for the 2021 Streetlight Project.

If you have any questions or concerns, please call D'Andra at the number listed in this letter. Thank you.

Sincerely,

A. D'Andra Buchanan

A. D'Andra Buchanan, P.E.
Civil Engineer, City of Lakewood
