APPLICATION NUMBER AND NAME: LU-20-00027 Western State Hospital Master Facilities Plan;

PROJECT DESCRIPTION: The State Department of Social and Health Services has proposed a complete reconstruction of Western State Hospital and its campus. The proposed master plan update proposes an expansion of the hospital capacity including:

1. A new 350-bed forensic hospital on the property. This will require the demolition of several existing buildings on site.
2. A new 18-bed residential cottage at the Child Study and Treatment Center.
3. A new community residential treatment facility (RTF) of 48 beds, contingent on completion of a parallel study to site community facilities throughout the region.

Long term, the state's goal is to transition the hospital to serve primarily forensic patients (those who have been processed through the criminal justice system) and fewer civil commitment patients, which make up the majority of the approximately 850 patients on site today.

To support the new buildings, infrastructure and circulation improvements are also included in the proposal.
